

ABSTRACT OF THE DISCLOSURE

1
2 A system and method for sending, via email, imaging data stored
3 in a personal imaging repository located on a computer connected to an email
4 web server providing an email web service. The present invention includes a
5 personal imaging repository for storing imaging data that is to be accessed by
6 requested web services, an email web content for emailing selected imaging
7 data stored in the personal imaging repository responsive to user selection, such
8 that the email web content is generated by the email web server and available
9 for transferring to a browser. An email web server for providing the email web
10 content and transferring the selected imaging data to a recipient mail server is
11 further included. The personal imaging repository is an exchange
12 infrastructure between the imaging data and available web services on the
13 Internet.
